

# SOITA's Mission

## Vision Statement

The students, educators, and school personnel in SOITA member schools will become more proficient lifelong learners through appropriate access to a variety of learning technologies and experiences. The learning community in our SOITA member schools will be able to effectively utilize technology in order to optimize their life experiences in an increasingly complex and rapidly changing world.

## Mission Statement

The purpose of the Southwestern Ohio Instructional Technology Association is to serve the regional instructional technology needs of the SOITA member schools. SOITA will strive to provide the member educators those instructional technology services that will assist them in optimizing student learning and achievement. As a support agency for member teachers, technology coordinators, media specialists and administrators, SOITA will facilitate the use of high quality instructional technology to improve both teaching and learning.
